PROJECTS

- **Objective:** To develop a fully functional e-commerce application to facilitate online shopping with user-friendly navigation, secure transactions, and efficient product management.
- **Technologies Used:** HTML, CSS, JavaScript, Python, Django, SQLite3
- **Key Achievements:** Developed a responsive front-end interface using HTML, CSS, and JavaScript, ensuring compatibility across various devices and browsers.
  Implemented a robust back-end using the Django framework and SQLite3 database, providing secure and efficient data handling and storage.
  Created user authentication and authorization features, enhancing security for user accounts and transactions.
  Integrated payment gateways to enable seamless online transactions, boosting customer convenience and sales.
  Deployed a comprehensive product management system, including inventory tracking, order processing, and customer management functionalities.
- **Challenges Overcome:** Resolved data synchronization issues between the front-end and back-end, ensuring real-time updates and smooth user experiences.
- **Skills Gained:** Advanced knowledge in full-stack web development, proficiency in Python and Django, enhanced skills in database management, and experience in developing secure and scalable web applications.
